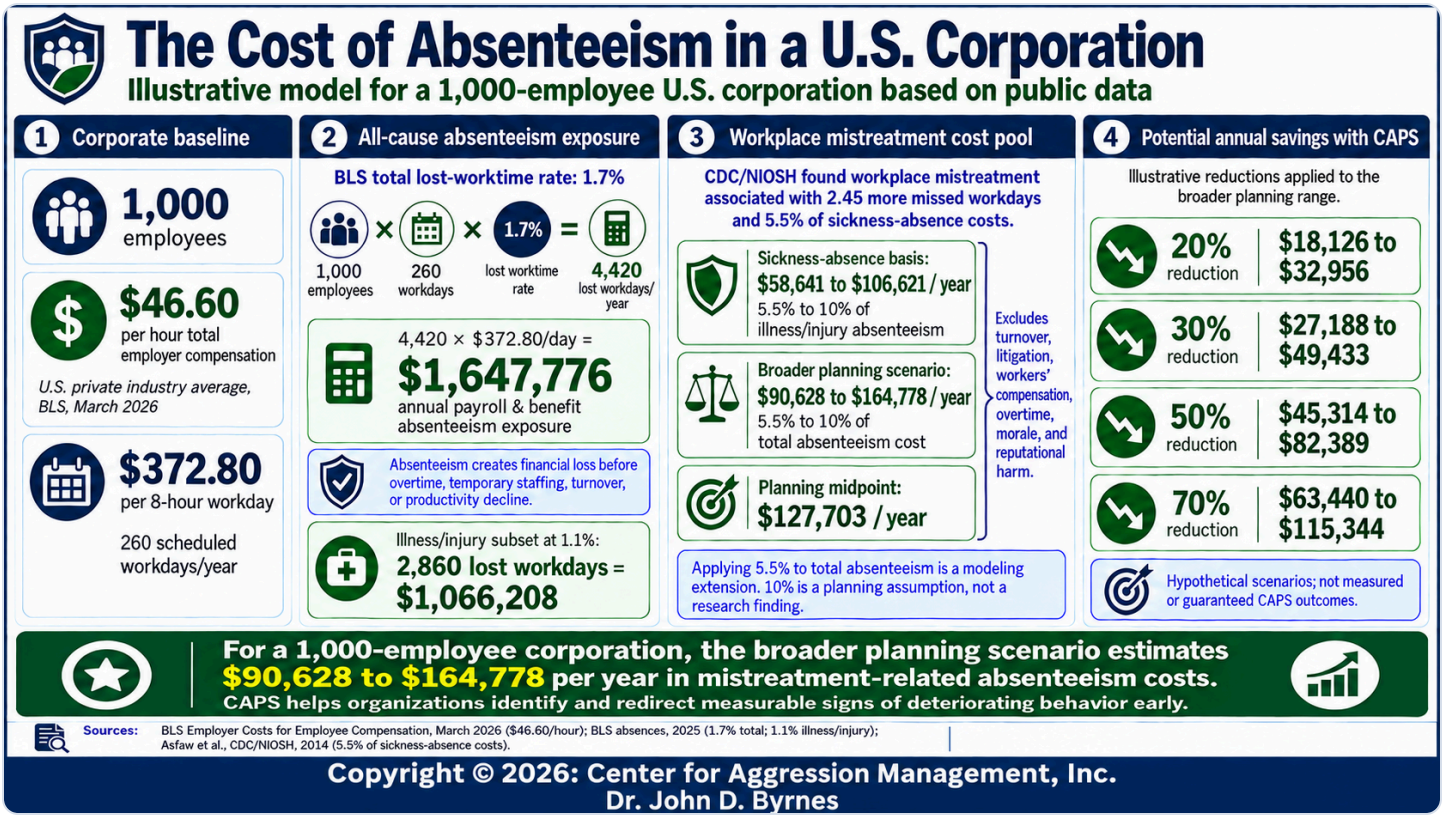
FOR HOME CARE, PT & OT AGENCIES

Your caregivers walk in alone. Train them before the first shift.

Agitated clients and stressed families are part of the work. Caregivers who spot escalation early stay safer, miss fewer shifts and stay longer. Dr. John Byrnes' model shows how fast the cost of absenteeism adds up in a 1,000-person workforce; scale it to your own team and the case is the same.



Get-in-the-door training

A short prevention program for new caregivers, therapists and coordinators, built into onboarding.

For the families you serve

The same early-warning skills for family members, so the home is calmer for everyone.

Trusted Service Provider

Agencies that train with us can be introduced to homeowners and families in the Pure Expertz local network.
