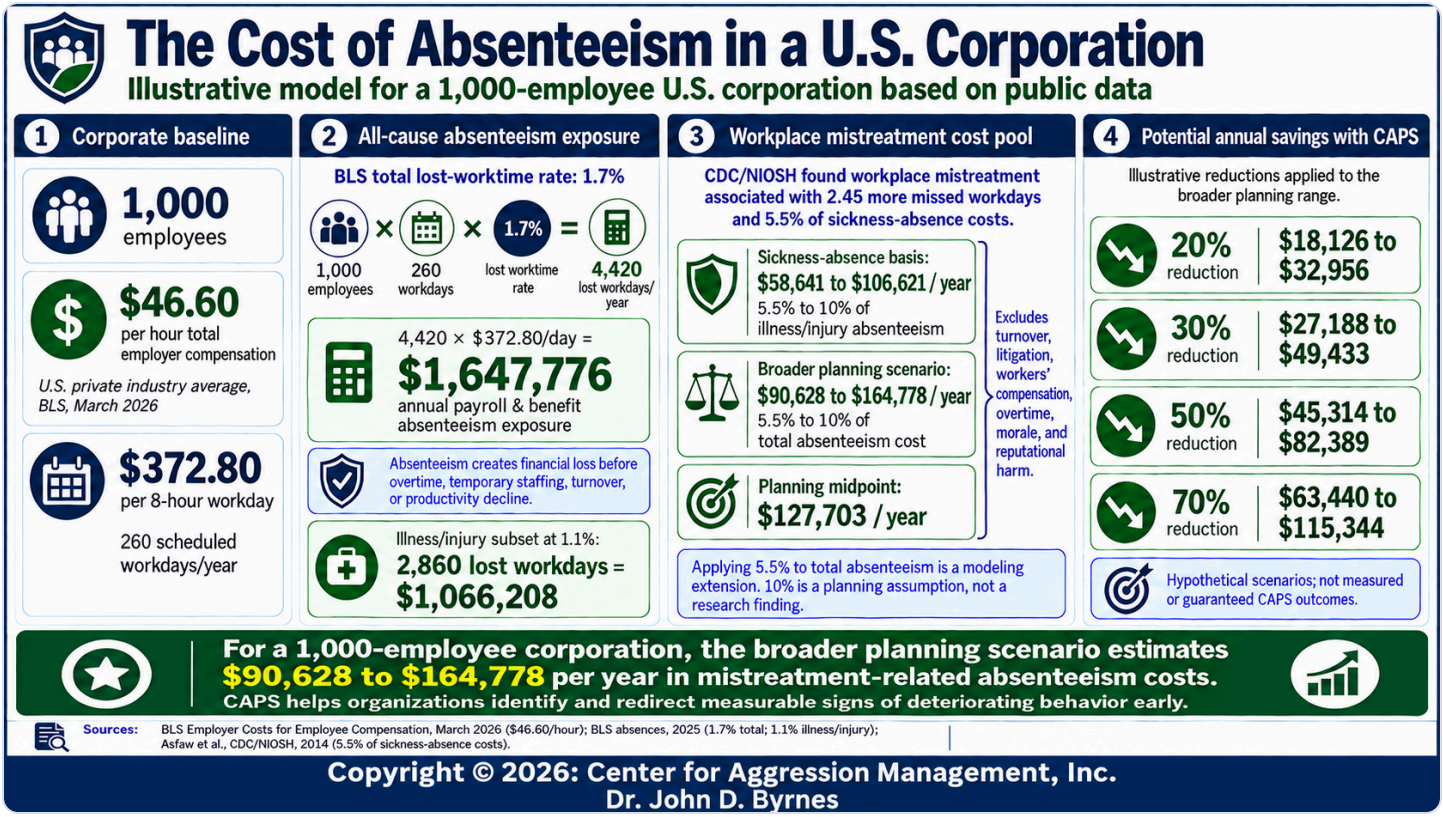
FOR SECURITY SERVICE PROVIDERS

Give your clients prevention, not only response.

Your officers respond to incidents. Your clients pay for what happens before the call: missed workdays, turnover and claims. Dr. John Byrnes' model for a 1,000-employee U.S. company puts a number on that cost, and it gives your account managers a new conversation with every site you guard.



Add it to your offer

Bring prevention training alongside post orders, patrols and access control. It's a reason to meet the client's HR and operations leaders, not only facilities.

What Pure Expertz does

We handle the rollout with you: scheduling, client communication, the technology and simple reporting your clients can see.

Your next step

A 25-minute partner briefing. We walk through the model and how a prevention offering fits your contracts.
